

RESPIRATION

1. What is respiration? Differentiate between respiration and breathing?
2. Give chemical equation for respiration?
3. How do plants respire? List main organs of plants involve.
4. How do animal respire-(a) frog (b) amoeba (c) earth worm.
5. How do grasshopper breath? Explain.
6. How do we inhale air in our lungs explain.
7. What is cellular respiration?
8. Name the organs involve in breathing in humans?
9. Differentiate between aerobic and anaerobic respiration?
10. Oxygen is carried to the cells by the blood. In what form is oxygen carried in the blood.
11. Explain the process of lungs in absorbing oxygen from surrounding.
12. Why does the breathing becomes faster while doing exercise.
13. Why do we get cramps after heavy exercise?
14. Why do you think we yawn when we are sleepy.
15. Why do mountaineers climbing high mountains carry oxygen cylinders with them?
