

# TRANSPORTATION OF MATERIAL IN PLANTS AND ANIMALS

1. What is vascular system?
2. Why do transportation is important for living organism?
3. What is the function of root hair?
4. How does water absorbed by the roots?
5. What do you understand osmosis?
6. What is transportation?
7. What is ascent of sap?
8. What is translocation?
9. What is the need of circulatory system?
10. Write main functions of blood?
11. What will happen when platelets will become less in blood?
12. Differentiate between arteries and veins?
13. What is a capillary?
14. Write the function of heart with the help of neat diagram?
15. What is the need for excretion?
16. What is nephrons? Explain its main function?
17. What is dialysis?
18. Name main excretory organs of human being.
19. Name main constituents of blood?
20. Which vascular tissue is one directional and which is two directional.
